Notes

UP 30-06 has been reentered into the new AAR Embargo & Permit System as UP001506. The original effective date has not changed. Shipments will be allowed only for "Existing Traffic". "Existing traffic" is traffic that is moving for a consignee which tendered SPRB coal to UP between May 1, 2005 and July 18, 2005; AND that is moving under a rate document (contract or common carrier rate item) which was active as of July 18, 2005 (except that, if a contract in effect as of July 18, 2005 subsequently expires or is terminated, the traffic covered by the expired or terminated contract will be allowed under a common carrier rate).
