APPENDIX C.	INDEX BY ORGANIZATION TYPE
APPENDIX D.	INDEX BY CODE

INTRODUCTION AND GUIDE

Introduction

Pennsylvania Power and Light Electric Utilities (PPL) and Public Service Electric and Gas Company (PSE&G) (Applicants) have requested a construction and right-of-way (ROW) permit from the National Park Service (NPS) for the expansion of an existing electric transmission line that crosses NPS lands within Pennsylvania and New Jersey and the addition of a second larger 500,000 volt line (500kV). The need for a new line somewhere in the region is based on direction for electric transmission expansion provided by the Regional Transmission Operator, PGM Interconnection, which oversees the overall movement of wholesale electricity between many electric utilities throughout a 13 state region. The Applicants' proposed project, the Susquehanna (Berwick, PA) to Roseland (NJ) line, proposes to expand upon an existing ROW which contains a single 230,000 volt (230kV) electric transmission line (a non-critical element of the transmission grid) by replacing the existing towers with new, taller tower structures and adding an additional 500,000 volt (500kV) line; which will be a critical element of the transmission grid. The request would necessitate widening the existing ROW and constructing new access roads. The expanded line and new towers will impact three units of the National Park Service: the Delaware Water Gap National Recreation Area (DEWA); the Middle Delaware National Scenic and Recreational River and National Recreation Water Trail; and the Appalachian National Scenic Trail (AT). The NPS is preparing an Environmental Impact Statement (EIS) to evaluate the impacts to the natural and human environment from the Applicants' proposal and to assist us in making a decision on the issuance of permits.

Public Scoping Process Summary

On January 21, 2010, the NPS released the Public Scoping Newsletter for the Susquehanna to Roseland Transmission Line EIS to the public for review and comment. The newsletter included a description of the purpose and need, project description and background, preliminary alternatives, project objectives, and a list of issues and impact topics. The newsletter was available for public review until March 12, 2010.

During the scoping period, three public meetings were held in Pennsylvania and New Jersey from February 16 – 18, 2010. Meetings were held in Bushkill, Pennsylvania (February 16th); Lake Hopatcong, New Jersey (February 17th); and Parsippany, New Jersey (February 18th). Each scoping meeting began at 6:00 PM with an open house followed by a meeting overview by a NPS project manager and welcome from the Park Superintendents. Formal public comment sessions were then recorded by a court reporter. The evenings concluded with a return to an open house. NPS staff was on hand to visit with meeting attendees and to answer questions.

A total of 311 individuals attended the public scoping meetings in Pennsylvania and New Jersey. A total of 102 attendees spoke during the formal public comment sessions. The number of attendees and formal commenters at each meeting was as follows:

- Bushkill, Pennsylvania – 93 attendees and 27 formal commenters
- Lake Hopatcong, New Jersey – 98 attendees, 36 formal commenters

- Parsippany, New Jersey – 120 attendees, 39 formal commenters

The public were able to submit their comments on the project using any of the following methods:

- Electronically through the NPS Planning, Environment, and Public Comment (PEPC) website
- In person at the public meetings
- By telephone on the Park Information Telephone Line
- By mailing comments to the NPS
- By emailing comments to the NPS

Nature of Comments Received

Over 6,500 pieces of correspondence from over 29 states, and 4 countries (United States, United Kingdom, France, and Yugoslavia) were received during the public scoping period. Approximately 6,343 letters submitted were from individuals living within the proposed area for the Susquehanna to Roseland Transmission line (Pennsylvania and New Jersey). Among the commenters from Pennsylvania and New Jersey, the topics that received the majority of the comments were expressions of support for or opposition to the project, concerns regarding the visual quality of the area, concerns for wildlife and wildlife habitat, and concerns about the health and safety of individuals living in close proximity of the proposed transmission line.

All comments, regardless of their topic, were carefully read and analyzed and are presented in this report. Commenters will continue to be notified of the project's progress, and are encouraged to visit the NPS PEPC website at www.parkplanning.nps.gov/dewa to view information pertaining to this project.

The Comment Analysis Process

Comment analysis is a process used to compile and combine similar public comments into a format that can be used by decision makers and the Susquehanna to Roseland Transmission Line EIS Team. Comment analysis assists the team in organizing, clarifying, and addressing technical information pursuant to National Environmental Policy Act (NEPA) regulations. It also aids in identifying the topics and issues to be evaluated and considered throughout the planning process.

The process includes five main components:

- Developing a coding structure
- Employing a comment database for comment management
- Reading and coding of public comments
- Interpreting and analyzing the comments to identify issues and themes
- Preparing a comment summary

A coding structure was developed to help sort comments into logical groups by topics and issues. The coding structure was derived from an analysis of the range of topics discussed during internal NPS scoping, past planning documents, and the comments themselves. The coding structure was designed to capture all comment content rather than to restrict or exclude any ideas.

The NPS PEPC database was used for management of the comments. The database stores the full text of all correspondence and allows each comment to be coded by topic and issue. Some outputs from the database include tallies of the total number of correspondence and comments received, sorting and reporting of comments by a particular topic or issue, and demographic information regarding the sources of the comments.

Analysis of the public comments involved the assignment of the codes to statements made by the public in their letters, email messages, voicemails, and comments stated at the public meetings. All comments were read and analyzed.

Although the analysis process attempts to capture the full range of public concerns, this content analysis report should be used with caution. Comments from people who chose to respond do not necessarily represent the sentiments of the entire public. Furthermore, this was not a vote-counting process, and the emphasis was on content of the comment rather than the number of times a comment was received. This report is intended to be a summary of the comments received, rather than a statistical analysis.

Definition of Terms

Primary terms used in this document are defined below.

Correspondence: A correspondence is the entire document received from a commenter. It can be in the form of a letter, email, written comment form, note card, open house transcript, or petition. Each piece of correspondence is assigned a unique identification number in the PEPC system.

Comment: A comment is a portion of the text within a correspondence that addresses a single subject. It should include information such as an expression of support or opposition to the use of a potential management tool, additional data regarding an existing condition, or an opinion debating the adequacy of the analysis.

Code: A grouping centered on a common subject. The codes were developed during the scoping process and are used to track major subjects throughout the EIS process.

Concern: Concerns are a written summary of all comments received under a particular code. Some codes were further separated into several concern statements to provide a better focus on the content of the comments.

Guide to this Document

This report is organized as follows:

Content Analysis Report: This is the basic report produced from PEPC that provides information on the numbers and types of comments received, organized by code. The first section of the report provides a summary of the number of comments that were coded under each topic. The second section provides general demographic information, such as the states where commenters live, the number of letters received from different categories of organizations, etc.

Public Scoping Comment Summary: This report summarizes the substantive comments received during the scoping process. These comments are organized by codes and further organized into concern statements. Below each concern statement are representative quotes, which have been taken directly from the text of the public's comments and have not been edited; therefore some spelling and grammar errors were not corrected. Representative quotes further clarify the concern statements.

Correspondence Index of Organizations: This provides a listing of all groups that submitted comments, arranged and grouped by the following organization types as defined by PEPC: business; churches and religious groups; civic groups; conservation/preservation groups; federal government; NPS employees; non- governmental groups; recreational groups; state government; town or city government; tribal government; unaffiliated individuals; university/professional society. In many instances, the organization type was not defined by the commenter; therefore, organizations were listed as "Unaffiliated Individuals". Each piece of correspondence was assigned a unique identification number upon entry into PEPC. This number can be used to assist the public in indentifying the way NPS addressed their comments. This list is organized alphabetically.

Correspondence Index of Individual Commenters: This provides a listing of all of the individuals who submitted comments during the public scoping period. Like the previous index, each correspondence was assigned a unique identification number which can be used to assist individuals in identifying the way in which NPS addressed their comments. This list is organized alphabetically. Those correspondence identified as N/A represent individuals who did not submit their first or last name.

Index by Organization Type: This list identifies all codes that were assigned to each individual piece of correspondence and is arranged by organization type. In many instances, the organization type was not defined by the commenter; therefore, organizations were listed as "Unaffiliated Individuals". Those correspondence identified as N/A represent individuals who did not submit their first or last name.

Comment Index by Code: This list identifies which commenters or authors (identified by PEPC organization type) commented on which topics, as identified by the codes used in this analysis. The report is organized by code, and under each code is a list of the authors who submitted comments that fell under that code, and their correspondence numbers. Those correspondences identified as N/A represent unaffiliated individuals.

PUBLIC SCOPING COMMENT SUMMARY

AL1100 - No Action Alternative: Supports

Concern ID: 23174
CONCERN STATEMENT: Commenters expressed their support for the No Action Alternative and identified that this would be the only alternative that would not cause major impacts.
Representative Quote(s): Corr. ID: 943 Organization: Not Specified
Comment ID: 124727 Organization Type: Unaffiliated Individual
Representative Quote: i sincerely ask nps to strongly consider the 'no action' alternative or to recomend a 'reasonable' alternative.
Corr. ID: 961 Organization: Not Specified
Comment ID: 124795 Organization Type: Unaffiliated Individual
Representative Quote: The No- Action Alternative is the only option that would not result in major adverse impacts and impairment of park resources.

AL1110 - No Action Alternative: Opposes

Concern ID: 23175
CONCERN STATEMENT: Commenters feel that this project is necessary and expressed their opposition to the No Action Alternative.
Representative Quote(s): Corr. ID: 523 Organization: Not Specified
Comment ID: 123753 Organization Type: Unaffiliated Individual
Representative Quote: No Action will put the entire northeast region in jeopardy in terms of brown outs and blackouts causing major catastrophic events. Loss of power on the grid is a serious threat to our region which can cause loss of life and prosperity that is unimaginable and unacceptable. I reject the idea you have stated in your newsletter, and I quote "The project will result in the existing non- critical element of the grid becoming a critical part of the grid, requiring a much more constant and intrusive operational presence."

AL1200 - Alternative Route A: Supports

Concern ID: 23176
CONCERN STATEMENT: Commenters are in support of Route A and they are opposed to putting the transmission line through the park.
Representative Quote(s): Corr. ID: 291 Organization: Not Specified
Comment ID: 123915 Organization Type: Unaffiliated Individual

Representative Quote: I think route A or C should be used, not route B as proposed.

AL1210 - Alternative Route A: Opposes

ConcernID: 23177

CONCERN STATEMENT: [Commenters expressed their opposition to the transmission line along Route A.](#)

Representative Quote(s): Corr. ID: 232 Organization: Delaware Highlands Conservancy

Comment ID: 123672 Organization Type: Unaffiliated Individual
Representative Quote: We strongly urge you, however, to eliminate Route A as a possible route for the Susquehanna Roseland transmission line project.

Corr. ID: 336 Organization: Hotel Fauchere

Comment ID: 124009 Organization Type: Unaffiliated Individual
Representative Quote: I urge you not to consider Route A as an alternative to the applicant's preference of Route B.

ConcernID: 23178

CONCERN STATEMENT: [Commenters are opposed to the transmission line along Route A due to the detrimental impacts to the wildlife and nesting bald eagles.](#)

Representative Quote(s): Corr. ID: 440 Organization: Not Specified

Comment ID: 123343 Organization Type: Unaffiliated Individual
Representative Quote: Using Route A would be extremely detrimental to the native wildlife and beautiful scenery. I cannot bear the thought of threatening nesting bald eagles and all of the other wildlife by implementing Route A.

Corr. ID: 599 Organization: Not Specified

Comment ID: 124174 Organization Type: Unaffiliated Individual
Representative Quote: I strongly oppose using Route A for a new power line. This will destroy miles and miles of pristine forest land, disrupt nesting bald eagles and cross within the protected Delaware River area at its far northern end. The adverse impacts to scenic resources and wildlife would be extensive if Route A is selected.

ConcernID: 23179

CONCERN STATEMENT: [Commenters are opposed to the transmission line along Route A due to the economic loss of property value.](#)

Representative Quote(s): Corr. ID: 733 Organization: Not Specified

Comment ID: 124523 Organization Type: Unaffiliated Individual
Representative Quote: As a Montville resident, I oppose the power lines which would lower property values in my neighborhood and more importantly increase exposure to the children of our community

Corr. ID: 1028 Organization: Not Specified

Comment ID: 123217 Organization Type: Unaffiliated Individual
Representative Quote: Route A would have a significant negative impact on the environment of the many private property owners along Route A

AL1300 - Alternative Route B: Supports

Concern ID: 23180
CONCERN STATEMENT: Commenters expressed their support for the transmission line along Route B.
Representative Quote(s):
Corr. ID: 140 Organization: Not Specified
Comment ID: 122868 Organization Type: Unaffiliated Individual
Representative Quote: We feel that proposed Route B, is the route that should be used because it follows existing lines and has less property impact than the other routes that were considered.
Corr. ID: 1257 Organization: Not Specified
Comment ID: 123537 Organization Type: Unaffiliated Individual
Representative Quote: I and my wife feel that Route "B" is the best route for the Susquehanna- Roseland power line Project. Route "B" is the best of the three routes and we hope that is the one that will selected.
Corr. ID: 1676 Organization: Not Specified
Comment ID: 124911 Organization Type: Unaffiliated Individual
Representative Quote: As such, I believe that the currently route approved by the utilities and regulators has already factored in the least possible impact upon the park, its users and its natural resources. I urge you to accept that the existing right of way is the best alternative for this vital link in the power grid.

AL1310 - Alternative Route B: Opposes

Concern ID: 23181
CONCERN STATEMENT: Commenters expressed their opposition to the transmission line along Route B.
Representative Quote(s):
Corr. ID: 406 Organization: Not Specified
Comment ID: 123148 Organization Type: Unaffiliated Individual
Representative Quote: Simply, I and my family, neighbors and friends are in total disagreement with the ENTIRE path of the route for the power line that takes it through the Delaware Water Gap National Recreation Area.
Corr. ID: 1542 Organization: Not Specified
Comment ID: 123829 Organization Type: Unaffiliated Individual
Representative Quote: I think the - - the intrusion that either of the alternate routes over here, A or B, would terribly disrupt the area.

AL1400 - Alternative Route C: Supports

Concern ID: 23182
CONCERN STATEMENT: [Commenters expressed their support for the transmission line to run along Route C.](#)
Representative Quote(s):
Corr. ID: 1202 Organization: Abington Council of Governments
Comment ID: 123477 Organization Type: Town or City Government
Representative Quote: At this point, Route C, or some variant of it, would be much more preferable than anything approved by PPL and the PUC
Corr. ID: 1652 Organization: Not Specified
Comment ID: 124037 Organization Type: Unaffiliated Individual
Representative Quote: If indeed there is a compelling need for this project, alignment of plan C avoids National Park lands and has the shortest overall distance in New Jersey, and has far fewer topographical impacts.

AL1410 - Alternative Route C: Opposes

Concern ID: 23183
CONCERN STATEMENT: [Commenters expressed their opposition to the transmission line along Route C.](#)
Representative Quote(s):
Corr. ID: 217 Organization: Not Specified
Comment ID: 123621 Organization Type: Unaffiliated Individual
Representative Quote: Keep the proposed Susquehanna- Roseland Electric Reliability Project - Alternate Routes 500kV power line out of Randolph NJ. We do not need or want this in our neighborhood.
Corr. ID: 369 Organization: Not Specified
Comment ID: 124250 Organization Type: Unaffiliated Individual
Representative Quote: DO NOT ROUTE THE SUSQUEHANNA- ROSELAND RELIABILITY PROJECT LINES ALONG PROPOSED ROUTE C
Corr. ID: 1009 Organization: Not Specified
Comment ID: 123180 Organization Type: Unaffiliated Individual
Representative Quote: We live in Moore Township and are against the line coming though North Hampton County. So we again are opposed to Route C

Concern ID: 23184
CONCERN STATEMENT: [Commenters expressed their opposition to the transmission line along Route C due to health and safety concerns.](#)
Representative Quote(s):
Corr. ID: 398 Organization: Brookfield Condo. Assn.
Comment ID: 124515 Organization Type: Unaffiliated Individual
Representative Quote: is no doubt that installing the towers in the proposed route "C" corridor would adversely impact the health of our residents because of the

electromagnetic field that would be generated from the towers and would also have a significant negative impact on our property values.

Corr. ID: 561 Organization: Not Specified

Comment ID: 124104 Organization Type: Unaffiliated Individual

Representative Quote: Please do not run the new power lines through Montville / Boonton Township or any other residential area. There is enough medical evidence to at least raise doubts over health concerns that these lines should not be located near homes and/or schools.

AL1510 - Alternative Route Yard's Creek: Opposes

Concern ID: 23185

CONCERN Commenters expressed their opposition to the Yards Creek alternative to Route B.
STATEMENT:

Representative Corr. ID: 1238 Organization: Not Specified
Quote(s):

Comment ID: 123528 Organization Type: Unaffiliated Individual

Representative Quote: The Yards Creek route is perhaps most objectionable since it will mar the remarkable vista of Pennsylvania visible from the Appalachian Trail and Worthington State Forest.

AL1700 - Permit Denial with New Alternatives Proposed

Concern ID: 23186

CONCERN Commenters expressed their opposition to the transmission line along
STATEMENT: Route B and requested that the National Park Service deny the
Applicants' permit application. Commenters expressed interest in using
alternative energy resources for generation.

Representative Corr. ID: 102 Organization: Not Specified
Quote(s):

Comment ID: 122495 Organization Type: Unaffiliated Individual

Representative Quote: The National Park Service should do everything in its power to fulfill its obligation to protect this beautiful resource for us, our children, grandchildren and generations to come. strongly encourage the NPS to reject PSE&G's plans to so negatively impact the Delaware Water Gap Area. The NPS should be protecting the lands under its charge and encourage PSE&G to move towards renewable energy alternatives.

Corr. ID: 139 Organization: Not Specified

Comment ID: 122863 Organization Type: Unaffiliated Individual

Representative Quote: I oppose the upgrade and expansion of the power line. PSE&Gs right of way was created when the country was just being electrified, transmission lines are no longer cutting edge technology. Investing in renewable energy distributed around New Jersey would be a safer and cleaner alternative.

Corr. ID: 1540 Organization: Not Specified
Comment ID: 125391 Organization Type: Unaffiliated Individual
Representative Quote: Please save our pristine park for future generations. Although we understand that people need power, we believe people should be encouraged to conserve. We would prefer windmills and the sun to generate power, not encouraging coal power.

Concern ID: 23187
CONCERN
STATEMENT: Commenters expressed their opposition to the transmission line along Route B and requested that the National Park Service deny the Applicants' permit application. Commenters expressed interest in using underground electric lines as an alternative to the proposed action.

Representative Quote(s): Corr. ID: 103 Organization: Lehigh Valley Kayak and Canoe Club
Comment ID: 122574 Organization Type: Unaffiliated Individual
Representative Quote: Why not cross the river with the power lines going under ground in a special pipe? That way we avoid destroying the viewshed at the same time we are delivering power. There is no question in my mind that this is feasible. It may even be less costly than huge towers and wide rights of way.

Concern ID: 23188
CONCERN
STATEMENT: Commenters expressed their opposition to the transmission line along Route B and requested that the National Park Service deny the Applicants' permit application. Commenters expressed interest in using new routes for the transmission line.

Representative Quote(s): Corr. ID: 925 Organization: Rock the Earth
Comment ID: 124637 Organization Type: Unaffiliated Individual
Representative Quote: There are reasonable, practicable, permanent and reliable alternative routes that would have less adverse impact upon the environment, the Park Units, and this very special region. One possible route, which the Applicants have dismissed but should be reviewed by the NPS as a less intrusive alternative, is to run the transmission lines along Interstate 80 or along some other route completely outside of the Park Units. Another less intrusive alternative would be to run the cable underground. Yet still, another less intrusive alternative would be to utilize existing, advanced cable technology and utilize the currently located electrical towers, without the need to construct new towers two and half times the size of the current ones. Still other alternatives that should be considered include: modernizing the grid and utilization of "Smart Grid" technology; utilization of localized renewable energy sources or "distributed generation" sites which would obviate the need for transmission lines through the Park

Units; possibly burying the transmission lines beneath the Delaware River.

Corr. ID: 1238 Organization: Not Specified

Comment ID: 123532 Organization Type: Unaffiliated Individual

Representative Quote: I urge you to reject any power line intrusion on the Delaware Water Gap National Recreation Area, the land, water and hills set aside by congress that the NPS holds in trust for all Americans. If the need for increase power supply is independently demonstrated; investigate alternative routes beyond those suggested as well as NJ generated renewable energy sources.

AL1710 - Permit Denial with No New Alternatives

Concern ID: 23189

CONCERN Commenters expressed their opposition to the transmission line along
STATEMENT: Route B and requested that the National Park Service deny the
Applicants' permit application.

Representative Corr. ID: 48 Organization: Not Specified
Quote(s):

Comment ID: 122289 Organization Type: Unaffiliated Individual

Representative Quote: Please do not permit PSE&G to build roads & staging areas for towers in the Delaware Water Gap. I do not want the Appalachian trail moved by them.

Corr. ID: 50 Organization: Not Specified

Comment ID: 122290 Organization Type: Unaffiliated Individual

Representative Quote: As someone who cares about the Environment, open spaces, and our beautiful parks, please do not permit PSE&G to expand its right- of- way through the Delaware Water Gap National Recreation Area and across the Appalachian Trail.

Corr. ID: 383 Organization: Sierra Club, Pennsylvania
Chapter

Comment ID: 124393 Organization Type: Unaffiliated Individual

Representative Quote: We respectfully urge the National Park Service (NPS) to deny PPL's proposal to construct multiple 150 feet towers and 500 kV transmission lines traversing the entire width of the recreation area.

AL1800 - Alternatives: Questions the Alternative Development Process

Concern ID: 23190
CONCERN STATEMENT: Commenters are questioning why the National Park Service will be evaluating Alternatives A and C in the EIS since the Applicants' have chosen Route B to carry forward.

Representative Quote(s): Corr. ID: 135 Organization: Not Specified

Comment ID: 122703 Organization Type: Unaffiliated Individual
Representative Quote: I do not understand why the other routes are being considered again, the decision was to use Route B and now it may be changed. We do not want these towers in our backyards, it is dangerous to our families and children, not to mention bring down the property value of the homes.

Corr. ID: 282 Organization: Not Specified

Comment ID: 123896 Organization Type: Unaffiliated Individual
Representative Quote: I am disappointed to learn that the National Park Service is considering a change to the previously agreed upon route ("B") of the Susquehanna- Roseland Electric Reliability Project.

Corr. ID: 328 Organization: Drop the Lines

Comment ID: 123997 Organization Type: Unaffiliated Individual
Representative Quote: I am concerned about the NPS's ability to dictate that the alternative routes A and C be reconsidered as possible routes for the transmission line, although they have already been ruled out by the regulatory agency.. It has been stated that the NPS will study all the alternates and provide a recommendation.

Concern ID: 23191
CONCERN STATEMENT: Commenters have suggested that the National Park Service expand the scope of the EIS and evaluate additional alternatives for the transmission line.

Representative Quote(s): Corr. ID: 636 Organization: Not Specified

Comment ID: 124285 Organization Type: Unaffiliated Individual
Representative Quote: I do not believe that enough time has been spent researching alternative analysis which could include existing disturbed area/Power Lines which can be refurbished to meet the new power needs.

Corr. ID: 812 Organization: Not Specified

Comment ID: 124588 Organization Type: Unaffiliated Individual
Representative Quote: I urgently request the NPS to broaden the scope of the EIS and search for better alternatives that the preliminary options currently proposed. The impact to a unique and irreplaceable resource

would be unconscionable. The big picture of the long term impacts and tradeoffs must be looked at further before proceeding - the options for different routes all the way back to the source must be taken into consideration. It would be a horrible and uncorrectable mistake to go forward with only the current options - the NPS must take a longer term view of this project.

Corr. ID: 1515 Organization: Environmental Conservation Council

Comment ID: 125336 Organization Type: Unaffiliated Individual
Representative Quote: Alternatives

The NPS must also consider alternatives that PSE&G and PPL may not feel are optimal. The Scoping Report and Newsletter provide a good start at listing various alternatives that need to be analyzed - but stops short of what is legally required.

AP1100 - Applicant's Proposal: Question Need for the Proposed Project

Concern ID: 23192

CONCERN STATEMENT: Commenters are questioning the need for the proposed upgraded transmission lines. Commenters do not believe that the new line is needed for security purposes, a higher demand for electric power, or to deal with peak energy demands.

Representative Quote(s): Corr. ID: 182 Organization: Not Specified

Comment ID: 123358 Organization Type: Unaffiliated Individual
Representative Quote: Furthermore, the issue is not whether route A, B or C is selected, but whether this line is truly needed given the reduction in demand for electric. Much of the projected demand growth done by PJM was before the recent recession and as we clearly see as utility rates continue to increase demand has fallen and both residential and commercial users are finding alternatives. We recently had our first community resident install solar and our community is actively exploring passive solar at some of our amenities.

Corr. ID: 1503 Organization: Alliance for Sustainable Communities- Lehigh Valley

Comment ID: 125291 Organization Type: Unaffiliated Individual
Representative Quote: The power companies say they need this line to deal with peak energy demands. However, peak energy demand only occurs 50 hours out of the year. There are other alternatives for dealing with this, which have not been examined during this process despite the fact that the DOE requires that alternatives to transmission upgrades be considered.

Corr. ID: 1569 Organization: Not Specified

Comment ID: 125238 Organization Type: Unaffiliated Individual
Representative Quote: The power companies claim the lines are needed for homeland security. Yet, a more expansive line would be much more visible and more vulnerable target. Improved security of the grid would be better achieved through microgrids- - local generation and use.

Corr. ID: 1625 Organization: Not Specified

Comment ID: 125072 Organization Type: Unaffiliated Individual
Representative Quote: The power companies must prove that their proposal for this line is the ONLY reasonable way to meet needs BEFORE new lines are considered. The power companies have failed to show a true need for these lines. They say there will be congestion in the grid but they have not presented anything substantive to back up their position. According to the US Energy Information Administration (www.eia.doe.gov), over the next 20 years, electricity demand is only projected to rise ~1.5%. However, the new line will increase transmission by 750%. This is way out of balance. There is no clear need for this line.

AP1200 - Applicant's Proposal: Reliability Standards

Concern ID: 23194

CONCERN STATEMENT: Commenters state that the new transmission line is needed in order to maintain a reliable power grid and prevent black outs and brown outs.

Representative Quote(s): Corr. ID: 1461 Organization: Commerce and Industry Association of New Jersey

Comment ID: 125443 Organization Type: Unaffiliated Individual
Representative Quote: As this panel is aware, PJM, an independent group tasked with ensuring grid reliability, warns that without this upgrade, the region risks brownouts and blackouts beginning as early as 2012.

Corr. ID: 1599 Organization: Not Specified

Comment ID: 125322 Organization Type: Unaffiliated Individual
Representative Quote: I believe this project will not only increase the overall reliability of the existing electric infrastructure in the state of NJ, but also reduce carbon emissions for our children and grandchildren.

Concern ID: 23195

CONCERN STATEMENT: Commenters state that the current power grid is reliable and if there is a need for an increase in power than other alternatives should be looked into for those short time periods.

Representative Quote(s): Corr. ID: 309 Organization: jdalexander@optonline.net

Comment ID: 123955 Organization Type: Unaffiliated Individual

Representative Quote: 'reliability' - They say that this project is important to the 'reliability' of the power grid. If you push aside all the smog you find that the reliability issue they may fail to meet may occur in about 3 years. What is this failure really? Put shortly, it is the failure to meet the power demand needs during the 'peak' 10 hours during the peak month of the year. That means that for the REMAINING 8,750 hours of the entire year they will be able to meet the energy demand & do it rather easily.

Corr. ID: 478 Organization: Morris County Ttrust for Historic Preservation

Comment ID: 123454 Organization Type: Unaffiliated Individual

Representative Quote: A new smart grid is under design, which will let transmitters direct power among existing grids to handle varying peak demands, thus increasing everyone's reliability. Yet this design is not even mentioned - much less accommodated - in the Susquehanna-Roseland plan.

AQ4000 - Air Quality: Impact Of Proposal And Alternatives

Concern ID: 23210

CONCERN [Commenters noted that the transmission line upgrade would generate air emissions and create adverse impacts to air quality.](#)
STATEMENT:

Representative Corr. ID: 201 Organization: Not Specified
Quote(s):

Comment ID: 123523 Organization Type: Unaffiliated Individual

Representative Quote: Additionally, the transmission line is proposed to transmit coal generated power from the midwest to the northeast. New Jersey's air quality is already degraded by emissions from midwestern coal fired generating plants. Building this line will only encourage more power generation from coal, further compromising New Jersey's air quality.

Corr. ID: 383 Organization: Sierra Club, Pennsylvania Chapter

Comment ID: 124407 Organization Type: Unaffiliated Individual

Representative Quote: If built, the Susquehanna Roseland line will precipitate some of the oldest and dirtiest coal plants in the country to increase output and therefore air pollution because coal produces electricity is cheapest more cheaply and would receive priority for transmission. This pollution will exacerbate mercury contamination, ground- level ozone formation, regional haze, acid rain, fine particulate pollution and, as a result, asthma and other respiratory illnesses, heart attacks, and premature deaths. Burning coal is a leading cause of smog, acid rain, global warming, the neurotoxin mercury and other air toxics.

Corr. ID: 1068 Organization: Sierra Club, New Jersey

Comment ID: 123287 Organization Type: Conservation/Preservation
Representative Quote: In addition, the Park should consider increased air pollution in and around the Park. Special attention should be given to the emissions of particulate matter, which increase haze and decrease visibility along the Delaware Water Gap and the Appalachian Trail.
Corr. ID: 1626 Organization: Lower Longwood Lake Cabin Owners Associations.

Comment ID: 125109 Organization Type: Unaffiliated Individual
Representative Quote: Coal combustion produces two to five times more oxides of nitrogen than gas- fired plants, and almost twice the carbon dioxide. Only coal plants produce significant mercury. The pollutants will be emitted upwind of the three parks, and their immediate impacts must be assessed as part of this investigation

AT1100 - Appalachian Trail: Comments Specific to Park

Concern ID: 23196
CONCERN
STATEMENT: Commenters expressed their concern for moving a portion of the Appalachian Trail and request the National Park Service to deny this action.

Representative
Quote(s): Corr. ID: 15 Organization: Not Specified

Comment ID: 122101 Organization Type: Unaffiliated Individual
Representative Quote: Please do not move, change, adjust, or allow the Appalachian Trail to be impacted in any way by the request for PSE and G to install new power lines. The impact on the AT would be irreversible and highly damaging.

Corr. ID: 270 Organization: Not Specified

Comment ID: 123873 Organization Type: Unaffiliated Individual
Representative Quote: Please do not change the path of the Appalachian Trail through the Gap.

Concern ID: 23197
CONCERN
STATEMENT: Commenters are concerned that placing the transmission line along the Appalachian Trail would damage the views along a beautiful section of the trail.

Representative
Quote(s): Corr. ID: 7 Organization: Not Specified

Comment ID: 122087 Organization Type: Unaffiliated Individual
Representative Quote: Please preserve the tranquility and views of the Applacian Trail, forever.

Corr. ID: 383 Organization: Sierra Club, Pennsylvania Chapter

Comment ID: 124435 Organization Type: Unaffiliated Individual

Representative Quote: Visitor Experience · Obstructed Vistas - The DWG provides some of the finest views in the region but these amazing natural scenic vistas will be impeded by massive towers and ill- placed transmission lines. · Appalachian Trail - Some of the most amazing sights experienced at the Delaware River Gap are experienced by users of the Appalachian Trail. However, the high- voltage transmission line will traverse the trail and obstruct users' views and inhibit their natural experience.

Corr. ID: 418

Organization: Not Specified

Comment ID: 123235 Organization Type: Unaffiliated Individual

Representative Quote: The New Jersey section of the Appalachian Trail is one of the most historic and scenic. For more than 100 years people have hiked this portion of the trail. Construction will impact the trail directly and will ruin the views from one of the best portions of the trail.

CC1100 - Consultation and Coordination: Involve Additional Agencies

Concern ID: 23198

CONCERN
STATEMENT:

[Commenters suggest that the National Park Service consult with additional state and federal agencies and additional tribal governments throughout the EIS process.](#)

Representative
Quote(s):

Corr. ID: 1523

Organization: Delaware Riverkeeper Network

Comment ID: 125365 Organization Type: Unaffiliated Individual

Representative Quote: Sister agency and Tribal Governmental Comment NEPA regulations require that Federal agencies consult with Indian tribes early in the NEPA process. Tribal leaders of three different Shawnee Nations, the Oneida Indian Nation, the Onondaga Indian Nation and the Mohawk Tribe only learned about the Susquehanna-Roseland Transmission Line Project and the National Park Service's planned Environmental Impact Study on March 3, 2010; two days before the public comment period is due to expire. Each of those tribal nations, as well as the Delaware Nation, has expressed an interest in how this project will impact their ancestral lands and the cultural and archeological resources of the study area.

The Delaware Riverkeeper Network contacted each of the 8 Indian Nations listed on the NPS's February 1, 2010 outreach letter and learned that the 5 Seneca Nations that received the letter do not view this portion of Pennsylvania an area they are actively engage in. DRN spoke to the tribal historic preservation office of the Seneca and was told that the Oneida, Onondaga, Mohawk and Shawnee all have ancestral interests in eastern Pennsylvania and would likely make comment on

any project that would have cultural impacts. DRN contacted each of those Tribal offices and none had received the NPS's communication.

DRN strongly urges the NPS to again reach out to the appropriate Tribal Government leaders and solicit comment on this project. An extension of at least 30 days should be given to the Tribal Governments so they may have the adequate time to thoroughly assess the total and cumulative impacts that the Susquehanna- Roseland Transmission Line Project will have on their ancestral lands.

Further, in that same February 1, 2010 letter to the Pennsylvania PUC, the NPS used "cc" as the method of outreach to sister agencies. No specific person or "Attention to" notations were used in this mailing. The NPS may have initiated other, more direct outreach soliciting sister agency comment. However, considering the certain and widespread direct and indirect impact that the S- R Transmission Line Project will have on the DWGNRA, the Delaware River Watershed, the region, the states of Pennsylvania, New Jersey, Maryland, West Virginia and Virginia, we urge to NPS (if not already done) to make direct contact with specific personnel of those sister agencies providing them with the information and time necessary for their thoughtful and complete comment.

Corr. ID: 1678 Organization: Not Specified

Comment ID: 124913 Organization Type: Unaffiliated Individual

Representative Quote: Regarding the NEPA review and Environmental Impact Statement, I urge you to contact the Forest Service and ask that they be involved in the review of all Forest Legacy projects this proposed project would impact in order to expand the scope of the EIS and to address and evaluate those impacts.

Corr. ID: 1839 Organization: Not Specified

Comment ID: 125937 Organization Type: Unaffiliated Individual

Representative Quote: In the Internal Scoping Document the National Oceanic and Atmospheric Administration and National Marine Fisheries Service were not identified as cooperating agencies and should be invited to participate in the process. This project has potential impacts on short nose sturgeon, Atlantic sturgeon, and other aquatic populations that require the expertise of this federal agency to address. The New Jersey Geological Survey must be invited to provide expertise on aquifers' recharge and ground water quality management related to possible impacts of the project. The Division of Watershed Management must participate because this power line cuts across the Upper Delaware Watershed and through landscape connectivity that could potentially produce significant impacts in that watershed. The Office of Natural

Resource Restoration will be necessary to speak to about what impacts might be mitigated and what impacts will be impossible to address. The Division of Environmental Regulation should be asked to participate to provide expertise on New Jersey's air quality standards in reviewing this project. Besides divisions of the NJDEP, the New Jersey Public Advocate, Rate Counsel was not identified as a cooperating agency despite their role as an intervening party in the applicant's hearings before the NJ Board of Public Utilities. The Rate Counsel is needed to determine how much more it will cost ratepayers to maintain a wider ROW and the larger towers if these permits are approved. As a part of local government participation, each municipal environmental commission affected by the line should be asked to serve as a cooperating agency to study localized cumulative and secondary impacts. The Forest Service is a critical component to this EIS for the expertise the agency can provide on impacts resulting from this project including loss of landscape connectivity and contiguous forest cover, edge effects on core forests, and guidance on forests as carbon sinks and how de-vegetation along the ROW coupled with newly created capacity on the upgraded power line for coal-fired energy will contribute to climate change. This agency must be included in all future correspondence related to scoping and impact study for this project.

CC4000 - Climate Change: Impact of Proposal and Alternatives

Concern ID: 23211
 CONCERN STATEMENT: Commenters noted that the use of coal-derived energy would increase greenhouse gases and contribute to climate change.
 Representative Quote(s): Corr. ID: 67 Organization: Not Specified

Comment ID: 122311 Organization Type: Unaffiliated Individual
 Representative Quote: The issue of climate change and greenhouse gases to be addressed in the EIS should include identification of the sources of power generation for this expanded project. These sources have been identified by some as coming from dirty coal.

Corr. ID: 256 Organization: Not Specified

Comment ID: 123736 Organization Type: Unaffiliated Individual
 Representative Quote: believe this action will have very negative environmental impacts for a number of reasons. First, I do not believe we should be encouraging PSE&G to export coal-derived energy to other markets via these lines. They are promoting climate change and profiteering, and this is not benefiting Pennsylvanians or New Jerseyans in any way.

Corr. ID: 383 Organization: Sierra Club, Pennsylvania Chapter

Comment ID: 124410 Organization Type: Unaffiliated Individual
 Representative Quote: Facilitate Global Warming - Coal is the largest single source of global warming pollution in the United States. The Intergovernmental Panel on Climate Change has reported that global warming threatens human populations and the world's ecosystems with intensifying heat waves, floods, drought, and extreme weather and by spreading infectious diseases.

CR4000 - Cultural Resources: Impact Of Proposal And Alternatives

Concern ID: 23212

CONCERN STATEMENT: Commenters expressed their concern for the adverse impacts to the many cultural resources throughout the park due to the transmission line upgrade.

Representative Quote(s): Corr. ID: 383 Organization: Sierra Club, Pennsylvania Chapter

Comment ID: 124441 Organization Type: Unaffiliated Individual
 Representative Quote: Cultural/Historic Landscapes - The DWG possesses a rich history in geological and cultural significance. The park encompasses significant Native American archeological sites as well as early settlement structures from the colonial period. The entire region was a frontier of the French & Indian War. Historic rural villages from the 18th and 19th centuries remain intact on the New Jersey side, and landscapes of past settlements are scattered throughout the park. DWG played a primary role in the formulation of the National Park Service's cultural landscape programs and the cultural resource policy established by the NPS in the late 1970's. As a result, cultural landscape preservation is now an established program in the National Park Service and a profession nationwide. High-voltage transmission lines constructed through the DWG would not only be a threat to the cultural, historical and natural characteristics possessed by DWG but a direct violation of the policies that were implemented by the National Park Service to protect the integrity of such landscapes. '

Corr. ID: 925 Organization: Rock the Earth

Comment ID: 124630 Organization Type: Unaffiliated Individual
 Representative Quote: The proposal also threatens a rich historical landscape containing 70 significant sites that have been or are being entered on the National Register of Historic Places. These include archaeological sites, sites used for interpretative history and are a fundamental resource for visitors to not only learn about, but experience the past. Some of the most threatened historic locations include Van Campens Glen, the Appalachian National Scenic Trail, Old Mine Road Historic District, Watergate, Delaware View, and Community Drive.

ER4000 - Energy Resources: Impact of Proposal and Alternatives

Concern ID: 23213

CONCERN STATEMENT: Commenters expressed concern for an increase in energy usage and inefficiencies in the transmission line upgrade.

Representative Quote(s): Corr. ID: 1018 Organization: Not Specified

Comment ID: 124879 Organization Type: Unaffiliated Individual
Representative Quote: Secondary energy effects to be examined include the increased energy consumption that will result from upgrading the power lines as more power will be brought into New Jersey. Part of this analysis should discuss how bringing more energy into New Jersey will affect future energy conservation efforts. Energy consumption impacts should be calculated for the lifetime of the proposed alternative and should be an aspect of the irreversible commitment of resources section of the EIS.

Corr. ID: 1569 Organization: Not Specified

Comment ID: 125239 Organization Type: Unaffiliated Individual
Representative Quote: Transmitting power over long distances is inefficient and results in loss of power due to resistance -- a terrible waste of energy and resources. Microgrids are far more efficient.

GE4000 - General Ecology: Impacts of Proposal and Alternatives

Concern ID: 23208

CONCERN STATEMENT: Commenters express concerns for impacts to the general environment due to the proposed transmission line.

Representative Quote(s): Corr. ID: 449 Organization: Hardwick Township
Environmental Commission

Comment ID: 123382 Organization Type: Unaffiliated Individual
Representative Quote: I am also concerned about the potential impact that such a construction project might have on the natural environment. The addition of electrical towers this large must also include widening the Right of Way that the towers currently have and also require the building of access roads through the forest.

Corr. ID: 609 Organization: Not Specified

Comment ID: 124201 Organization Type: Unaffiliated Individual
Representative Quote: The proposed power line project should NOT be approved or proceed further. There is environmental, health, eco-tourist, quality of life issues to name just a few. In addition this project promotes the further degradation of our natural resources and is not ecologically or economically sustainable.

GP1100 - General Project: Supports

Concern ID: 23199
CONCERN STATEMENT: [Commenters expressed their general support for the transmission line upgrade and supported the need for the project.](#)
Representative Quote(s): Corr. ID: 722 Organization: Public Service Electric and Gas Company
Comment ID: 124510 Organization Type: Unaffiliated Individual
Representative Quote: The need to complete the Susquehanna to Roseland 500kv Electric Transmission line in as timely and cost efficient manner is crucial to the reliability and bottom line energy costs of the many customers who will draw their electric power from it.
Corr. ID: 1532 Organization: Not Specified
Comment ID: 125381 Organization Type: Unaffiliated Individual
Representative Quote: The PSE&G/PPL proposal sounds like a reasonable approach for all involved, including the recreational users of the area, who can support PSE&G and PPL on their proposal to balance progress with maintaining our outdoors space and natural resources.
Corr. ID: 1585 Organization: Not Specified
Comment ID: 125283 Organization Type: Unaffiliated Individual
Representative Quote: I am in favor of the Susquehanna to Roseland 500kV Electric Transmission Line because it will bring employment to a great many local residents, at wages that can sustain a family in this economy.

GP1200 - General Project: Opposes

Concern ID: 23958
CONCERN STATEMENT: [Commenters expressed their general opposition for the transmission line upgrade.](#)
Representative Quote(s): Corr. ID: 228 Organization: Not Specified
Comment ID: 123659 Organization Type: Unaffiliated Individual
Representative Quote: I think overall that the project should not move forward at all.
Corr. ID: 324 Organization: Not Specified
Comment ID: 123987 Organization Type: Unaffiliated Individual
Representative Quote: These lines are not even needed!!! These power lines should not go in!!
Corr. ID: 1012 Organization: Not Specified
Comment ID: 123186 Organization Type: Unaffiliated Individual
Representative Quote: Hello I would like to be able to comment regarding the Susquehanna Roseland Transmission line, our family is strongly opposed

GR4000 - Geologic Resources: Impact Of Proposal And Alternatives

Concern ID: 23214

CONCERN STATEMENT: Commenters noted that the construction and maintenance of the transmission line and/or access roads would create adverse impacts to geological resources.

Representative Quote(s): Corr. ID: 329 Organization: Not Specified

Comment ID: 124000 Organization Type: Unaffiliated Individual
Representative Quote: Not only will one of our great East Coast treasures be burdeoned with an incredible eyesore, but the process of upgrading the towers will cause erosion, sediment accumulation and toxins to be dumped into the Delaware. And ltst not forget the animal and plant life loss.

Corr. ID: 383 Organization: Sierra Club, Pennsylvania Chapter

Comment ID: 124426 Organization Type: Unaffiliated Individual
Representative Quote: Geological Resources - Along the Delaware River in this region consist primarily of chiefly steep, stony and shaly areas along the river bluffs of the Delaware River. The major components of the landscape are the bluffs and cliffs and the material that has accumulated at the base of the slopes. Some of the most unusual plant communities in the county are found here and the bluffs add to the scenic quality of the Delaware River. The loose, shaly soil is mined from the base of the slopes for road surfacing and fill material. This community supports a good population of a state- rare plant (SP518) which is typically found on the Shale Cliff communities along the Delaware River. These geologic resources will be negatively impacted by the construction and maintenance of high- voltage transmission towers and transmission lines through the construction process and general maintenance through disturbance, deforestation, habitat fragmentation, erosion and subsidence.

Corr. ID: 1487 Organization: Eastern Environmental Law Center

Comment ID: 125647 Organization Type: Unaffiliated Individual
Representative Quote: Significant permanent scarring of the geological resources could occur, with geologic impacts far more severe than would occur in level topography. Specifically, please undertake a full examination of the geological formations that will be impacted by construction activities such as stability for construction, groundwater aquifers and water table depth, sinkholes, and springs. The proposed expansion of the ROW has the potential to affect the physical properties of the soil along and adjacent to the ROW by clearing land cover, and these impacts should also be studied.

HH4000 - Human Health and Safety: Impact of Proposal and Alternatives

Concern ID: 23215

CONCERN STATEMENT: Commenters noted concerns about health implications from overhead transmission lines to residents along the proposed routes and park visitors.

Representative Quote(s): Corr. ID: 313 Organization: Not Specified

Comment ID: 123963 Organization Type: Unaffiliated Individual
Representative Quote: As Director and Chief of the Division of Reproductive Endocrinology at Saint Joseph's Hospital in Paterson, New Jersey, I am acutely aware of the dangers that such lines bring to their surroundings. Certainly reports of cancer clusters around power lines are common knowledge, however their effects upon animal and human reproductive development is just as significant. I believe that the lines' proximity to a middle school further demands consideration. Those lines undoubtedly will jeopardize the health of the students and faculty attending that school.

Corr. ID: 314 Organization: Not Specified

Comment ID: 123967 Organization Type: Unaffiliated Individual
Representative Quote: There are many many people opposed to power lines in general because of the health risks including cancer, leukemia, Alzheimer's, the depreciation of property values, damage to crops and livestock, interference of homeland security and dangers to emergency response.

Corr. ID: 788 Organization: Not Specified

Comment ID: 122642 Organization Type: Unaffiliated Individual
Representative Quote: Then there is the need to revisit the issue of air pollution originating from western- lying coal- burning power plants. Residents of northwest New Jersey have been assaulted by unhealthy air quality from western- lying, coal- generated power for decades. Despite the purifying aspects of forest cover, Warren County's air quality tested no better than that of industrialized Elizabeth, NJ for the coal burning power plants located along the western bank of the Delaware River. Landmark asthma studies linked lung maladies in children to PP&L's former Martin's Creek coal- burner. For the time being, Reliant's coal burner at Portland continues to rain damaging fine particulates on local communities. The linear design expansion project proposed would facilitate increased coal- produced electricity from even more coal- fired plants to the west.

Corr. ID: 1664 Organization: Not Specified

Comment ID: 124063 Organization Type: Unaffiliated Individual
Representative Quote: I urge you to consider, these towers are going through communities, they are going through National Park Land, they

are going through places where people gather. The exposure to the electromagnetic fields which they take doesn't do anything, well, my son is living proof it does do it. And the other people the we have buried on our block are proof that it does do something. There are deleterious effects that these magnetic fields have.

Concern ID: 23216
 CONCERN Commenters expressed concern about the safety issues related to the
 STATEMENT: maintenance of the transmission line by helicopter.
 Representative Corr. ID: 327 Organization: Not Specified
 Quote(s):

Comment ID: 123996 Organization Type: Unaffiliated Individual
 Representative Quote: One last note, maintenance for these towers must be done by helicopter. This creates a serious accident risk not to mention the noise pollution. This is a huge concern for the Park Service. The height of the towers also pose real dangers from falling ice and snow in the winter months for the wildlife.

IN4000 - Infrastructure: Impact of Proposal and Alternatives

Concern ID: 23217
 CONCERN Commenters noted concerns for the additional access roads and the
 STATEMENT: potential damage from construction equipment on current roadways.
 Representative Corr. ID: 104 Organization: Not Specified
 Quote(s):

Comment ID: 122575 Organization Type: Unaffiliated Individual
 Representative Quote: My first concern has to do with the building of access roads through private property and public land in order to facilitate the project. I don't think this decision properly took into consideration the many miles of access roads that will have to be built to support the Route B choice. Miles & miles of NEW access roads are going to be required and I don't feel that PSE&G has properly addressed this issue. The miles of "temporary" access roads that will be crisscrossing the area in order to support the construction project are going to be very disruptive to the heavily forested, relatively undisturbed land of the Highlands region. These new wider graded access roads will encourage increased ATV and dirt bike use in the area and even after the roads have been "removed", trespassers will now have an easy access route to, though and inside the property of all residents located along the power line R- O- W.

Corr. ID: 1018 Organization: Not Specified
 Comment ID: 124873 Organization Type: Unaffiliated Individual
 Representative Quote: Potential degradation of roadways due to utilization by construction vehicles must be examined. The heavy

construction machinery and high traffic volumes associated with construction activities could ruin roads. Tax payers would be left to pay the costs of road repair. Therefore changes to local tax bases if road reconstruction was necessary should be considered in weighing each alternative. The traffic created by the construction activities will impact visitor experience as portions of the park will be completely inaccessible or require detours. Visitors will be greeted with congestion and messy construction sites. These impacts must be examined in light of visitation to the park and impacts to the economy of the local community.

Corr. ID: 1059 Organization: Not Specified

Comment ID: 123266 Organization Type: Unaffiliated Individual

Representative Quote: I do not believe our rural roads can handle the equipment that will be brought in without damage to the roads, environment

and our property. I've also heard that helicopters will be used. Where will they land? Do they plan to carve a launch pad into the Kittatiny Mountains?

NA1100 - Need for Analysis: Cumulative Impacts

Concern ID: 23200

CONCERN STATEMENT: Commenters are requesting for the National Park Service to analyze cumulative impacts in the EIS.

Representative Quote(s): Corr. ID: 340 Organization: New York/New Jersey Trail Conference

Comment ID: 124018 Organization Type: Unaffiliated Individual
Representative Quote: Building this powerline will open the way for more lines to come in the future.

Corr. ID: 417 Organization: Not Specified

Comment ID: 123210 Organization Type: Unaffiliated Individual
Representative Quote: The Susquehanna- Rosland transmission line is only one of many transmission lines being proposed throughout PA, NJ, and WV and around the country to move energy from coal power plants to the best paying markets. The National Park Service should consider the cumulative impact of all of these other lines - including air quality and climate change.

Corr. ID: 1487 Organization: Eastern Environmental Law Center

Comment ID: 125683 Organization Type: Unaffiliated Individual
Representative Quote: Impacts and actions that should be addressed in a cumulative fashion include, but are not limited to: road construction effects, activities leading to soil and vegetation disturbance, activities leading to changed habitat structure, activities leading to habitat

fragmentation, and activities causing air or water pollution. These cumulative impacts result from a number of cumulative actions, including other transmission line projects, and thus they must be addressed in a comprehensive manner.

Corr. ID: 1487 Organization: Eastern Environmental Law Center

Comment ID: 125685 Organization Type: Unaffiliated Individual
 Representative Quote: Cumulative and connected actions, such as potential benefits from reducing greenhouse gas emissions from electricity generation, decreased impacts from climate change, and potential impacts from additional infrastructure and reasonably foreseeable development of renewable energy generation plants, should be accounted for in the Draft EIS.

NA1200 - Need for Analysis: Long- Term Impacts

Concern ID: 23202

CONCERN STATEMENT: Commenters suggested that the National Park Service consider the long- term impacts to resources in addition to the short- term impacts.

Representative Corr. ID: 99 Organization: Schuylkill Action Network
 Quote(s):

Comment ID: 122384 Organization Type: Unaffiliated Individual
 Representative Quote: The overwhelming long- term impacts from this proposed pathway are unknown, largely under- studied and not well understood by either the industry or the regulators.

Corr. ID: 480 Organization: Not Specified

Comment ID: 123472 Organization Type: Unaffiliated Individual
 Representative Quote: The Delaware Water Gap National Recreation Area, Middle Delaware National Scenic and Recreational River, & the Appalachian National Scenic Trail are treasured jewels that have been set aside for future generations to enjoy. This line would have drastic and long- lasting impacts on air quality, view sheds and destroy the integrity of communities and scenic, historic and natural landscapes including parks, battlefields, important bird habitats and protected open spaces.

Corr. ID: 1582 Organization: New Jersey Conservation Foundation

Comment ID: 125944 Organization Type: Unaffiliated Individual
 Representative Quote: Construction roads are not temporary relative to ecological degradation. These roads cause fragmentation, soil compaction, invasion of alien species, and their effects are, in fact, permanent. The effects can magnify over the decades as the roads become conduits for invasion of alien species, pathogens and off- road vehicles. Please evaluate the long- term impacts of construction access

routes in the EIS.

NA1300 - Need for Analysis: Landscape Scale Impacts

Concern ID: 23203

CONCERN STATEMENT: Commenters would like the National Park Service to consider the impacts outside of the park on a landscape or watershed scale.

Representative Quote(s): Corr. ID: 383 Organization: Sierra Club, Pennsylvania Chapter

Comment ID: 124430 Organization Type: Unaffiliated Individual
Representative Quote: The NPS should complete a Scenery Management System to ensure a reliable, peer- reviewed method of comparing the visual impacts of alternative plans. This process is critical for projects that affect large areas of land and potentially impact the visual experience of large numbers of people.

Corr. ID: 1534 Organization: New Jersey Conservation Foundation

Comment ID: 123821 Organization Type: Conservation/Preservation
Representative Quote: Therefore, the EIS cannot look at the segment of the proposed transmission line that passes through these parks in isolation. Granted the requested permits will result in impacts to not only these irreplaceable parks, but also to the landscapes to which they are connected. Therefore the EIS must address not only the direct impacts of the right- of- way, but also the direct, indirect, and cumulative effects of the project as a whole.

Corr. ID: 1571 Organization: Delaware Riverkeeper Network

Comment ID: 123839 Organization Type: Conservation/Preservation
Representative Quote: We would like the National Park Service to consider many things which was mentioned already, but most importantly water quality, removing trees from the upper parts of the forest will allow sun to be on the water and reduce water quality, not only in these reaches of the river, but down lower in the watershed where we all know the water quality is at best horrific, and we would also like NPS to further its interest in landscape connectivity and not pass up on those interests which have frequently, throughout the history of the agency, it's been very important, and with those two considerations in mind we would like NPS not to forget that this is a bigger issue

NP4000 - National Park Service/Park Mission: Impact of Proposal and Alternatives

Concern ID: 23218

CONCERN STATEMENT: Commenters noted that accepting the Applicants' permit and allowing the transmission line upgrade through the park would not comply with

Representative
Quote(s): [the National Park Service mission and Organic Act.](#)
Corr. ID: 67 Organization: Not Specified

Comment ID: 122312 Organization Type: Unaffiliated Individual
Representative Quote: The direct and indirect effects of this huge construction project will impair the resources the Organic Act directs to be protected.

Corr. ID: 334 Organization: Not Specified

Comment ID: 124005 Organization Type: Unaffiliated Individual
Representative Quote: To preserve America's special places in their natural conditions forever; and to keep them open and accessible for the enjoyment of all Americans." The founding principals of our National Park system will be seriously and irrevocably impacted by a decision to erect towers in our National Parks

OC1100- Other Comments

Concern ID: 23231

[CONCERN STATEMENT:](#) [Commenters noted that the NPS should require mitigation measures.](#)

Representative
Quote(s): Corr. ID: 578 Organization: National Audubon Society

Comment ID: 124137 Organization Type: Unaffiliated Individual
Representative Quote: At the federal level, a similar protection strategy is in use at the US Fish and Wildlife Service (USFWS). USFWS always gives preference to avoidance over mitigation measures. The Service's approach seeks to maximize resource protection at or near the area of disturbance within the following prioritized schemes:

- resource avoidance over mitigation
- on- site mitigation over off- site compensation
- in- kind mitigation over out- of- kind mitigation

The approach will accommodate restoration of degraded habitats off site under certain circumstances, but, overall, the policy priority is for on- site, in- kind protections to the maximum extent possible.

Corr. ID: 1596 Organization: Natural Resources Defense Council

Comment ID: 125477 Organization Type: Unaffiliated Individual
Representative Quote: As indicated, mitigation measures as well as BMPs and technological solution should be required. These strategies will only work if they are mandatory and likely to tie in to the challenges specific to this project.

Concern ID: 23232
 CONCERN STATEMENT: Commenters expressed concern over the public meeting locations and public comment period.
 Representative Quote(s): Corr. ID: 692 Organization: Drop The Lines

Comment ID: 124444 Organization Type: Unaffiliated Individual
 Representative Quote: I do not think it fair at all, if the NPS is reviewing all three routes A, B and C, that the areas where the 3 meetings were held, were all in the route B area. Our area (proposed Route C) should have had the respect, a timely notice, the opportunity and convenience of an input meeting in our area as well, and more time to alert people to respond with comments, as not everyone reads the newspapers, not everyone who would be affected by a review of our area (proposed route C) got a letter, not everyone has a computer, nor do all those who could be affected know about this review!

Corr. ID: 1518 Organization: Adventure Sports
 Comment ID: 125349 Organization Type: Unaffiliated Individual
 Representative Quote: One of my concerns has nothing to do with the study itself, my concern is with the comment period. This park has millions of visitors every year and the vast majority of them come in the summer months. If the Park Service truly wants to hear its visitor's comments, the park ought to display information and provide areas for its visitors to leave comments over the summer months. These areas should be the most highly visited areas in the park. I can't imagine anyone coming off the river at Smithfield Beach would think it a good idea to put more power lines across the river, especially if they had to sleep underneath them and listen to the buzz all night long, which I am told only gets louder as the lines age. Or be woken by the helicopter that is flying over the now "critical" lines inspecting them.

PO4000 - Park Operations: Impact Of Proposal And Alternatives

Concern ID: 23219
 CONCERN STATEMENT: Commenters are concerned that the current budget would not include sufficient funding to monitor for adverse impacts.
 Representative Quote(s): Corr. ID: 1018 Organization: Not Specified

Comment ID: 124876 Organization Type: Unaffiliated Individual
 Representative Quote: This project will have significant ramifications on Park resources, impairment of resources in many cases, and the National Park Service is currently facing a three year budget freeze as called for by the Obama administration. Under this budget freeze the NPS will not access to funding for new management programs to combat invasive species, increased ATV use, and soil erosion along the

ROW, access roads, and study area. This EIS must examine how the lack of funding for such programs will affect the DEWA and APPA staff's ability to mitigate and manage the adverse impacts and impairment of park resources that will occur because of this project.

SA1100 - Study Area: Increase Study Area

Concern ID: 23204

CONCERN STATEMENT: Commenters suggest that the National Park Service expand the scope/study area of the EIS to include all areas along the routes.

Representative Corr. ID: 476 Organization: Preserve greystone

Quote(s):

Comment ID: 123451 Organization Type: Unaffiliated Individual
Representative Quote: Please expand the scope of your review to include the entire route of the line, and please support the no- build alternative in your eventual decision.

Corr. ID: 478 Organization: Morris County Trust for Historic Preservation

Comment ID: 123462 Organization Type: Unaffiliated Individual
Representative Quote: In summary, at this point we are urging you to expand the scope of the NEPA review to include the entire cultural area, and to take advantage of this chance to create a complete inventory of the resources present in both structural and archaeological form.

Corr. ID: 1582 Organization: New Jersey Conservation Foundation

Comment ID: 125932 Organization Type: Unaffiliated Individual
Representative Quote: The geographic scope preliminarily identified by the National Park Service (NPS) is insufficient. While the immediate area of concern for the NPS is the Delaware Water Gap National Recreation Area (Water Gap or DEWA), the Appalachian National Scenic Trail (AT), and the Middle Delaware Scenic and Recreational River (SRR), the proposed project affects a vastly broader area. These units of the National Park System are part of New Jersey's Skylands Tourism Region, and also connect a nationally significant larger region known as the Highlands of Pennsylvania, New Jersey, New York and Connecticut.

In addition, due to interconnections among four major transmission line projects within the mid- Atlantic region, including the Susquehanna-Roseland transmission line, all conceived as part of "Project Mountaineer," we urge the Park Service to broaden the scope of the EIS to cover all of the areas impacted by any of the four projects. All four lines, including the S/R line, the Trans- Allegheny Interstate Line (TrAIL), the Potomac- Appalachian Transmission Highline (PATH),

and the Mid- Atlantic Power Pathway (MAPP), should be evaluated together as a single action under NEPA.

Should NPS choose not to broaden the geographic scope to that extent, it should, at a minimum, consider impacts along the entire length of the Susquehanna- Roseland line, and in particular, impacts on the New Jersey Highlands Region, which includes the federal DOD Picatinny Arsenal, a facility which contains exceptional biodiversity resources.

SA1200 - Study Area: Decrease Study Area

Concern ID: 23950

CONCERN STATEMENT: Commenters stated that the NPS should not be allowed to evaluate other routes outside of the park boundary.

Representative Corr. ID: 1845 Organization: McCuire Woods LLP

Quote(s):

Comment ID: 125985 Organization Type: Unaffiliated Individual

Representative Quote: The NPS must decide the terms and conditions that would govern construction and use of the corridor where it lies within NPS jurisdictional lands, but the NPS would, in the Applicants' opinion, step well outside its role and responsibility if it were to evaluate alignment alternatives lying outside NPS- jurisdictional lands. The NPS is not a transmission- siting authority outside its own lands. To take steps that would imply otherwise will waste public and private resources, cause delay in securing the transmission grid, confuse the public and lead to unnecessary conflict with other government authorities. The NPS does not have authority to substitute its limited siting authority for that of the state and other federal entities with jurisdiction over private, state and other federal lands.

SC4000 - Security: Impacts of Proposal and Alternatives

Concern ID: 23205

CONCERN STATEMENT: Commenters stated that in order to protect the security of the transmission lines an upgrade to the electric grid is needed.

Representative Corr. ID: 203 Organization: Former Delaware Valley Conservation Association

Quote(s):

Comment ID: 123542 Organization Type: Unaffiliated Individual

Representative Quote: Security: Many electrical utility companies are keeping watch over and working on the security of Transmission Lines. The U. S. Government has acknowledged that our Power Grids are susceptible to cyber warfare. According to current and former National Security officials, the United States Electrical Grid, was infiltrated in April 2009, and software programs were left behind that are capable of disrupting the system. The Electric Reliability Corporation confirmed

that the electric grid needs more protection from attack. THEY STATE THAT MASSIVE POWER OUTAGES CAUSED BY CYBER ATTACK WOULD CAUSE A CRISIS OF NATIONAL TRAUMA.

Corr. ID: 1698 Organization: Not Specified

Comment ID: 124944 Organization Type: Unaffiliated Individual
Representative Quote: Major electrical utility companies are keeping watch over and working on the security of Transmission Lines. The U. S Government has acknowledged that our Power Grids are susceptible to cyber warfare.

Concern ID: 23206

CONCERN Commenters stated that an enlarged power line will be more susceptible
STATEMENT: to terrorist attacks.

Representative Corr. ID: 480 Organization: Not Specified
Quote(s):

Comment ID: 123470 Organization Type: Unaffiliated Individual
Representative Quote: The power companies have claimed that the lines are needed for homeland security. A long line would be a visible target and much more vulnerable. The best idea for improved security of the grid is microgrids- - local generation and use.

SE4000 - Socioeconomics: Impact Of Proposal And Alternatives

Concern ID: 23220

CONCERN Commenters are concerned a decrease in tourism would result due to
STATEMENT: the transmission line upgrade.

Representative Corr. ID: 327 Organization: Not Specified
Quote(s):

Comment ID: 123994 Organization Type: Unaffiliated Individual
Representative Quote: Tourism will decrease dramatically as hikers and nature lovers will no longer be able to come and enjoy the beauty of one of the areas most serene and beautiful landscapes.

Corr. ID: 788 Organization: Not Specified

Comment ID: 122637 Organization Type: Unaffiliated Individual
Representative Quote: Surrounding municipalities rely heavily on eco-tourism. To permit mass destruction of public land will kill local tourist economies.

Small business tourism is the backbone of surrounding local communities on both sides of the River. If vacationers do not come to the Park, loss of revenue will be very apparent in and among the local economies. The permanent construction of 190 foot goliath towers, visible for miles in all directions, would drive tourists elsewhere

Concern ID: 23221

CONCERN
STATEMENT:

Representative
Quote(s):

Commenters noted that the transmission line upgrade will benefit the socioeconomics of the area due to an increase in job availability.

Corr. ID: 919 Organization: Public Service Electric and Gas Company

Comment ID: 124620 Organization Type: Unaffiliated Individual
Representative Quote: I am contacting you to express my support of the Susquehanna to Roseland 500kv Electric Transmission Line project. This project will give a much needed upgrade of electric transmission as determined by the PJM and it will create over 800 jobs that are so desperately needed. I urge you to support the project and approve the permit so we can maintain electric reliability for our future.

Corr. ID: 1063 Organization: Not Specified

Comment ID: 124949 Organization Type: Unaffiliated Individual
Representative Quote: In conclusion as a resident of New Jersey, I see the proposed transmission line between Susquehanna and Roseland as a vital reliability upgrade that will benefit local businesses and citizens.

Concern ID:

CONCERN
STATEMENT:

Representative
Quote(s):

23222

Commenters noted that the transmission line upgrade will increase energy rates and taxes and decrease the value to homes along the routes.

Corr. ID: 372 Organization: Not Specified

Comment ID: 124255 Organization Type: Unaffiliated Individual
Representative Quote: We will all end up paying for this project in the form of higher utility rates, higher taxes, reduced property values, and the loss of the scenic beauty for which the New Jersey Highlands region is famous.

Corr. ID: 853 Organization: Not Specified

Comment ID: 122842 Organization Type: Unaffiliated Individual
Representative Quote: On top of that, PSE & G will eventually raise rates on residents to build these lines and that is like a double whammy. Residents who live near these lines do not want them and will also have to pay for them

SS4000 - Soundscapes: Impact of Proposal and Alternatives

Concern ID:

CONCERN
STATEMENT:

Representative
Quote(s):

23207

Commenters are concerned about the impacts to the soundscape from the construction of the transmission line and the noise emitted from the line itself.

Corr. ID: 1487 Organization: Eastern Environmental Law Center

Comment ID: 125654 Organization Type: Unaffiliated Individual
Representative Quote: Noise from demolition and construction is

obvious. The possibility of ground- borne vibration and noise impacts related to construction activities on habitat, steep slopes, etc. should also be studied. Additionally, noise from EHV transmission lines has been documented.

Corr. ID: 1523 Organization: Delaware Riverkeeper Network
Comment ID: 125360 Organization Type: Unaffiliated Individual
Representative Quote: Soundscapes and noise impacts During construction and routine maintenance noise levels will have an impact on wildlife and visitors' park experience. The DWGNRA and the surrounding forests and rural communities have a very quiet baseline background noise level. Current noise level studies must be part of the NPS EIS as well as the anticipated noise levels during construction, monitoring and maintenance of the proposed S- R.

It is reported that the S- R will have a persistent and constant audible static noise being emitted from the lines. All of the sound sources must be assessed in the study area. What will the park visitors' experience be like when they are hiking the AT or other ancillary trail and the hiker can hear noise levels and sounds one associates to industrial areas? The NPS EIS must assess that impact.

Also, considering the S- R Project will link several other transmission line projects that cross other federal lands, we request that you expand the scope of the study area to assess those areas too for sound and noise impacts during construction, routine monitoring and maintenance and the constant sound emitted once the project is completed.

SU1100 - Project Sustainability

Concern ID: 23953

CONCERN STATEMENT: [Commenters noted that the Applicant should look into using other sources of renewable energy.](#)

Representative Quote(s): Corr. ID: 241 Organization: Not Specified

Comment ID: 123703 Organization Type: Unaffiliated Individual
Representative Quote: It seems to me, that with today's technologies and resident emphasis on green alternatives, that surely there is a more environmentally friendly and cost effective way to achieve this goal. It seems to me, that with today's technologies and resident emphasis on green alternatives, that surely there is a more environmentally friendly and cost effective way to achieve this goal. Further exploring cleaner resources such as wind, solar and nuclear, located closer to the regions of need would eliminate raping hundreds of miles of land required to

upgrade these antiquated lines. Certainly the delivery of green, alternative energy would require either new, smaller lines (which for example could be erected along major throughfares, where access for construction and maintenance is already in place), or minimal upgrade to the existing lines that criss- cross this small, densely populated state. By submission of this letter, I am expressing STRONG opposition to the passage/approval of this massive, incredulously expensive project whose costs will be shouldered by all rate payers.

Corr. ID: 887 Organization: Bucks County Audubon Society
Comment ID: 124742 Organization Type: Unaffiliated Individual
Representative Quote: We need to be smarter and conserve energy and need to develop renewable and alternative energy sources so that we reduce green- house gases and create a more sustainable future for our children. Burning more coal is going in the opposite direction of that goal.

Corr. ID: 1565 Organization: National Parks Conservation Association

Comment ID: 125894 Organization Type: Unaffiliated Individual
Representative Quote: Retiring the existing powerline and right- of- way, as well as mitigating technologies such as underground superconductor and advanced cable technologies, are reasonable alternatives deserving close examination.

b. Careful consideration should be given to developing a buried powerline alternative.

Underground superconductor electricity pipelines are a proven technology that should be closely examined as an alternative. According to the American Superconductor company,

"Superconductor power cables have been developed and demonstrated numerous times over the past dozen years. These cable systems have been deployed in the commercial U.S. power grid several times in recent years and other cable projects are now ongoing globally in countries such as China, Japan and Korea? Given their location underground, Superconductor Electricity Pipelines are easier to site, are more secure and have no aesthetic impact on the surrounding land. They avoid significant permitting issues faced by ultra- high voltage overhead lines and require a right- of- way only 25 feet wide rather than hundreds of feet."

Due to challenges posed by topography, superconductor electricity pipelines might need to be sited above ground in certain areas as well.

c. An advanced cable technology alternative should also be examined.

Another alternative the NPS should examine is using advanced powerline technology to meet the transmission needs of PSE&G and PPL by using existing power transmission infrastructure already located in the park. According to the CTC Corporation's factsheet titled "Utilizing ACCCTM Conductor to Reduce the Environmental Impacts of New Transmission Line Development,"

"Using carbon fiber composite technology to replace the heavy steel core of traditional transmission conductors, the ACCCTM conductor offers greater strength, lighter weight, and decreased thermal sag when compared to conventional conductors. This lighter weight composite core allows the inclusion of 28% more aluminum in the same diameter without increased weight, allowing the delivery of up to twice the power of a conventional conductor while also reducing line losses by 34% to 38% under equivalent load conditions."

TE4000 - Threatened And Endangered Species: Impact Of Proposal And Alternatives

Concern ID: 23223

CONCERN STATEMENT: Commenters noted that endangered and threatened species are located within the park and along the proposed routes. Commenters are concerned about the adverse impacts to these species from the transmission line upgrade.

Representative Quote(s): Corr. ID: 362 Organization: Not Specified

Comment ID: 124233 Organization Type: Unaffiliated Individual
Representative Quote: The widening and construction will be very destructive of sensitive habitat. I have encountered timber rattlesnake while hiking in the Gap; why pressure this species and others any further?

Corr. ID: 342 Organization: Not Specified

Comment ID: 124143 Organization Type: Unaffiliated Individual
Representative Quote: Also, Route A would cross the Delaware at an area where bald eagles nest. I believe these birds are protected by the U.S. Fish and Wildlife Service.

Corr. ID: 383 Organization: Sierra Club, Pennsylvania Chapter

Comment ID: 124425 Organization Type: Unaffiliated Individual
Representative Quote: Endangered Species/Species of Special Concern - According to the Pike County Natural Inventory, certain Shale Cliff

communities high above the Delaware River support good populations of a state- rare plant (SP510, SP512).

Corr. ID: 1068 Organization: Sierra Club, New Jersey

Comment ID: 123289 Organization Type: Conservation/Preservation

Representative Quote: All alternatives must address the impacts on federally endangered species, and New Jersey and Pennsylvania state-level endangered species. Those include the Bobcat, the Red Shoulder Hawk, the Bald Eagle and the Swamp Pink. Effects to other species should be considered, as well, including the raptors, which many people have already brought up the issues concerning their relationship with the heightened transmission lines.

VE4000 - Visitor Experience: Impact Of Proposal And Alternatives

Concern ID: 23224

CONCERN STATEMENT: Commenters noted that the transmission line upgrade within the parks would adversely impact visitor experience.

Representative Corr. ID: 925 Organization: Rock the Earth
Quote(s):

Comment ID: 124627 Organization Type: Unaffiliated Individual
Representative Quote: RtE members will be directly affected by the proposed project for the construction of the power line through the Park Units in that such construction will destroy the natural beauty and character of the landscape of these remarkable and protect areas and, therefore, will diminish visitors'/members' ability to experience the Park Units in their natural state, thereby reducing visitor enjoyment.

Corr. ID: 925 Organization: Rock the Earth

Comment ID: 124632 Organization Type: Unaffiliated Individual
Representative Quote: Construction activities such as tree clearing and blasting would be an impact to visitor experience. In addition, bringing in large construction equipment and the towers via park roads and public roads would affect the visitor experience. Long term impacts to visitor experience may also occur. The visibility of the new towers above the existing tree- line will have an effect on visitors in the long term.

Corr. ID: 1018 Organization: Not Specified

Comment ID: 124875 Organization Type: Unaffiliated Individual
Representative Quote: This project would have major impacts on the visitor experience and essentially stop public outdoor recreation use and enjoyment in sections of the Park. Creation and expansion of access roads, increasing the height of the towers, and permanent closures of sections of the Park would have significant long term impacts on public enjoyment of the Park and an alternative that does not place the goals of the DEWA in jeopardy must be selected.

VQ4000 - Visual Quality: Impact of Proposal and Alternatives

Concern ID: 23209

CONCERN STATEMENT: Commenters noted that the transmission line upgrade would have an adverse impact to the visual resources within the area along the proposed route.

Representative Quote(s): Corr. ID: 1 Organization: Not Specified

Comment ID: 122076 Organization Type: Unaffiliated Individual
Representative Quote: The natural beauty of the area will be extremely compromised.

Corr. ID: 764 Organization: Not Specified

Comment ID: 122571 Organization Type: Unaffiliated Individual
Representative Quote: The scenic views are absolutely beautiful in all the seasons of the year. The fall vistas rival anything in New England! To put these huge, ugly towers here would completely destroy all this for everyone.

Corr. ID: 1068 Organization: Sierra Club, New Jersey

Comment ID: 123290 Organization Type: Conservation/Preservation
Representative Quote: First and foremost in the analysis, perhaps, shall be the effect on the scenic view and the character of the region. 190 foot towers in and around the Park will destroy the view. This should be a serious concern in the National Park Service analysis. The Sierra Club strongly believes, and as stewards of the land, the NPS cannot reasonably approve the towers and creation of new roads in the National Recreation Area and along the Appalachian Trail.

VR4000 - Vegetation And Riparian Areas: Impact Of Proposal And Alternatives

Concern ID: 23225

CONCERN STATEMENT: Commenters noted that the transmission line upgrade would include the clearing of acres of forested habitat which would cause fragmentation and increase in invasive plant species.

Representative Quote(s): Corr. ID: 105 Organization: Not Specified

Comment ID: 122590 Organization Type: Unaffiliated Individual
Representative Quote: This proposed expansion will lead to invasive plant species problems as fragmentation increases, less trees to help clean the Delaware River and its tributaries that provide drinking water to millions of people, and unsightly views from the River and the Appalachian trail.

Corr. ID: 314 Organization: Not Specified

Comment ID: 123966 Organization Type: Unaffiliated Individual
Representative Quote: These lines are a threat to the natural plant life,

natural waters, and the animals living there. There is a danger of huge forest and grass fires that will destroy the environment and it will take more than 50 years to grow and replace the damages. The animals will be fewer and may never re- populate the areas. There will be an overabundance of electromagnetic fields that will contaminate the air, the land and the water.

Corr. ID: 383 Organization: Sierra Club, Pennsylvania Chapter

Comment ID: 124420 Organization Type: Unaffiliated Individual
Representative Quote: Forest and Wildlife Habitat - The ridge tops provide critical habitat for a variety of wildlife as do the river beds and forests that lie within. In order for high- voltage transmission lines to be constructed and maintained, existing right- of- ways will have to be expanded and additional access roads will need to be constructed. The expanded line and new towers will impact three units of the NPS: the Delaware Water Gap National Recreation Area (DEWA); the Middle Delaware National Scenic and Recreational River and National Recreation Water Trail; and the Appalachian National Scenic Trail (AT). The construction of these roads will cause severe fragmentation of the forests and wildlife habitat and jeopardize wildlife diversity, and could negatively impact nesting and migration patterns. In addition, herbicides used to maintain brush within right- of- ways could endanger water quality and harm wildlife and human visitors.

Corr. ID: 383 Organization: Sierra Club, Pennsylvania Chapter

Comment ID: 124416 Organization Type: Unaffiliated Individual
Representative Quote: Forest Mortality - Pennsylvania continues to have high levels of tree mortality linked to acid precipitation and deposition from sulfur compounds emitted from power plants, in the sugar maple and other vulnerable PA forest species; which include important agricultural and economic forest crops, significantly impacting PA's economy.

WH4000 - Wildlife And Wildlife Habitat: Impact Of Proposal And Alternatives

Concern ID: 23226

CONCERN Commenters noted that the construction of the transmission line
STATEMENT: upgrade and access roads would destroy wildlife habitat.

Representative Corr. ID: 119 Organization: Not Specified
Quote(s):

Comment ID: 122644 Organization Type: Unaffiliated Individual
Representative Quote: I believe that the construction of a new right of way and the lines will have damaging effects to this wildlife.

Corr. ID: 925 Organization: Rock the Earth

Comment ID: 124629 Organization Type: Unaffiliated Individual
Representative Quote: The construction of massive transmission infrastructure through the three parks presents a myriad of impacts on wildlife and certain impacts to the resources listed above. Even if minimized, it is clear that noise from construction machinery and maintenance vehicles will negatively impact wildlife communication, habitat utilization, and reproductive success.

Corr. ID: 1612 Organization: Not Specified

Comment ID: 125055 Organization Type: Unaffiliated Individual
Representative Quote: Among the more surprising species of animals in the park are black bear, timber rattlesnakes, bald eagles, and, recently, nesting peregrine falcons. Ecosystems include hemlock ravines with bountiful rhododendron and ridgetops with prickly pear cactus. Did anyone ever think of the potential harm that the construction and the resulting structures may cause to the surrounding wildlife? The first effect is the clearing away of tree, shrub and other plant growth for the power line right- of- way. This growth will never be allowed to recover to it's original state, especially trees, due to safety issues for the power lines. This means a permanent loss of habitat for wildlife. And bird deaths resulting from collisions with overhead transmission lines, which have been reported for over 100 years (Coues 1876, Cohen 1896, Emerson 1904) will significantly increase. The overhead power line electromagnetic fields significantly increase eggshell thinning and reduce egg size, egg laying and hatching success in birds. EMF exposure has also negatively altered the behavior, physiology, gland secretion, and the immune system of birds which results in negative effects on their production and development. In addition to birds, many other animals are negatively affected by high power voltage lines. Nicholls and Racey (2007) found significantly reduced bat activity in areas with higher EMF levels. Bats are not only an important element of a heath ecosystem, but they also eat large numbers of insect pests.

Concern ID:
CONCERN
STATEMENT:
Representative
Quote(s):

23227

[Commenters noted that the upgraded transmission line would create adverse impacts to migratory birds.](#)

Corr. ID: 383 Organization: Sierra Club, Pennsylvania
Chapter

Comment ID: 124424 Organization Type: Unaffiliated Individual
Representative Quote: Bird Migration - More than 30 species of warblers have been recorded during spring migration. In the fall the Kittatinny Ridge provides an important migratory corridor for raptors. The Delaware River valley offers important wintering habitat for a large population of bald eagles attracted to the open water for foraging.

Transmission lines pose a serious threat to migrating and nesting birds through both collisions and electrocution.

Corr. ID: 1338 Organization: Not Specified

Comment ID: 123657 Organization Type: Unaffiliated Individual

Representative Quote: The increased right- of- way for the 500TV lines, crossing the Kittatinny Ridge will certainly have a negative impact on the migratory patterns of raptors. At the present time, the Kittatinny Ridge may be the most important raptor migration corridor in the East, possibly even more important than Hawk Mountain. The high towers on the river could also inhibit waterfowl routes as well as bald eagle movements.

WQ4000 - Water Resources: Impact Of Proposal And Alternatives

Concern ID: 23228

CONCERN STATEMENT: Commenters noted that the construction of the transmission line upgrade would destroy wetland areas along the proposed routes.

Representative Quote(s): Corr. ID: 383 Organization: Sierra Club, Pennsylvania Chapter

Comment ID: 124422 Organization Type: Unaffiliated Individual
Representative Quote: Potential impacts to wetlands associated with the construction and operation of this high- voltage transmission line project include:

- alterations to the wetland hydrology,
- alterations to the wetland plant communities, and
- loss of wetlands due to filling or sedimentation.

Corr. ID: 1839 Organization: Not Specified

Comment ID: 125968 Organization Type: Unaffiliated Individual

Representative Quote: Any impacts to the physical characteristics of wetlands resulting from the use of fill need to be examined. Impacts to wetlands that must be studied in this EIS are changes in water levels, flow characteristics, and circulation patterns, or flooding frequencies due to the project. Changes in substrate conditions may affect the ability of the wetland to sustain vegetation and wildlife populations. Increased nutrient loading could produce algal blooms and reduce available oxygen in the water.

Concern ID: 23230

CONCERN STATEMENT: Commenters noted that the construction of the transmission line upgrade and increase in coal burning energy will adversely impact the water quality of surface waters and ground water.

Representative Quote(s): Corr. ID: 238 Organization: Not Specified

Comment ID: 123687 Organization Type: Unaffiliated Individual

Representative Quote: Water quality downstream along the Delaware River would also be effected.

Corr. ID: 1059 Organization: Not Specified

Comment ID: 123267 Organization Type: Unaffiliated Individual

Representative Quote: I'm especially concerned about our water supply being contaminated and damage the integrity of our wells.

Pollutants and lubricants from drilling or chemicals and defoliants may leech into the water table. The runoff from access roads may cause pollution and flooding. It may compromise the beauty and safety of the ponds and the Delaware River.

Corr. ID: 1068 Organization: New Jersey Sierra Club

Comment ID: 123288 Organization Type: Conservation/Preservation

Representative Quote: The National Park Service should also consider increased water pollution. Increased burning of coal will increase the deposition of mercury and other heavy metals in surface water, and that includes nitrous oxide which will increase eutrophication in the waters.

Corr. ID: 1859 Organization: Not Specified

Comment ID: 126007 Organization Type: Unaffiliated Individual

Representative Quote: I am concerned about the water quality in the Delaware River. It states that the construction of these transmission lines will impact the water quality and the streams leading to the river. These trout streams are vital for the spawning of eggs. The fish & wildlife need to do an extensive study on this.

APPENDIX A. CORRESPONDENCE INDEX OF ORGANIZATIONS

Note: In many instances, the organization type was not defined by the commenter; therefore, organizations were listed as "Unaffiliated Individuals".
