Request No.	ITC Transmission Project
2.	<p>Witness David Grover testifies, and per the application, and IR responses, the ITC Midwest project, above-captioned, is a sub-part of MPV 3. MISO “approval,” modeling, benefits and attributes for this project are based on analysis of “MVP 3.” According to Grover’s testimony, costs for an MVP are recovered primarily pursuant to Schedule 26-A of the MISO tariff, and the annual revenue requirement recovered is determined pursuant to the formula rate in Attachment MM. Annual revenue requirement collected under Schedule 26-A is paid by all MISO network and point-to-point transmission customers. Minnesota ratepayers’ share is determined by the percent of total MISO energy used in Minnesota, estimated at 13.3 percent. Grover Direct, p. 8-9. The following requests are intended to identify the costs of the “Iowa portion” of MVP 3, the total costs for MVP 3, and to identify costs allocated to Minnesota.</p> <p>A.
