Hi Patrick,

I'm sending you (finally) my comments on the BOGY ECP. There are a lot of comments on it, but I've tried to condense it into some major points I wanted to discuss (on a separate sheet). I also have included a map I did of the 1/2 MID in which I tried to account for nearest neighbor (if that Nearest neighbor was outside the 10 mile buffer).

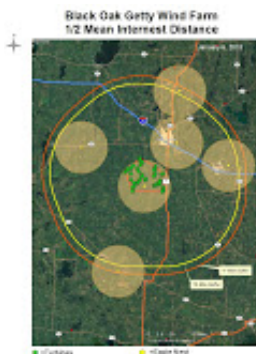

Let me know if you would like to meet up soon and discuss the ECP, as well as next steps.

Thanks,  
MAGs

Hi Mags!

I'm working through these – there are lots of really great comments, thank you! We would love to meet and discuss next steps. I think we will be done reading through everything by early next week and I'm going to try and put together a comment log so that I can track resolution to the comments so that we can keep tabs on where things are. Do you have availability at the end of next week or early the following week (the week of the 26<sup>th</sup>) to meet?

Hi Patrick,  
I tried to give you a call but you were on the phone. I am free Thurs before 12:30 this week. Next week I am available Monday: before 10:15, between 11:15-1, or 2-4.  
Tuesday I am free: all day  
Wednesday: any time except 1-2

This may change as I have a bunch of pending meetings right now, but if we can nail something down I can stake out the time!

Thanks,

MAGs

P.S. I need to send the newest version of the model - do I sent that to you or someone else?

Hi Mags,

Let's do Tuesday afternoon – like you, I have a lot of flexibility that day, would 2:00 work for you? I'm happy to drive over but I think the guys from Ecology and Environment will be on the phone.

Hi Patrick,

I am free at 2pm, but our conference room is reserved for another meeting (for an hour). I pretty much have the whole day free - is there another time that would work for you?

Thanks,

Mags

Sure, just about any time works for me as well, so whenever the room is open.

Sent while on the move. Please excuse the brevity and any typos.

Sometime before the meeting can you pull together an agenda so I know what to get prepared? Also, let me know if you have a conference number you want to use, or if you would like me to provide one.

Thanks,  
Mags

Yes, I'm working on it right now. Generally we are just hoping to talk about how we are approaching some of the more substantive comments in the ECP and some of the technical calculations, we should have a new model run as well using the revised R code you sent.

Hi Mags,

Not to spring this on you but would it be possible to also talk briefly about Northern Long Eared Bats at the beginning?
