Hello all-

We have recently filed our site application for the proposed 40MW Black Oak wind farm near Sauk Centre, Minnesota. We have discussed the project with you previously and received some comment letters, but now that it is moving forward, we would like to re-engage and discuss any of your comments or concerns, and how we plan to address them from here on. As we get closer to the meeting, we will send out some maps to anyone that cannot attend the meeting in person. Please call me with any questions.

Thanks!

Mike
