Hey Scott,

Hmm, the model does create a tmp object... but you shouldn't need to do anything with it. Could you send me your data input file so I can try to run it on my end? If you would prefer not to, I would suggest check to make sure your ExpSvy data frame looks correct.

Or let me know how many strata you are using and I can set up an input file that works and you can input your values into that to try to track down the problem.

- Emily

Hi Scott,

I am passing your question on to Emily and Matt, who are probably better equipped to answer your question. Let me know if no one gets back to you.

Thanks,  
Mags

Subject RE: model question

Hi Mags,

I have run the model and have one question. I am getting an error when running the collision model. Specifically, the error message is saying it cannot find the "tmp" value. I have walked through all of the modules and cannot find a "tmp" value or command. Is this value calculated from the Collision model? Or am I neglecting to provide a some information?

Thanks,  
Scott

Okay - I am not good at all on the model, however, if you send me specific questions I can forward them to Emily, who is our main modeler - she usually answers back really quickly and is pretty knowledgeable about this stuff. So, any questions you have, feel free to shoot them this way.

Thanks,  
Mags

Subjectmodel question

Hi Mags,

Disregard my last e-mail. I figured it out.

Thanks,
