Please share your comments on the proposed Rochester Natural Gas Pipeline Project (15-858)

- What human and environmental impacts should be studied in the environmental analysis?
- Are there any specific methods to address these impacts that should be studied in the analysis?
- Are there any routes or route segments that should be considered? (Related to the Route Permit)

Recommend following existing pipeline that parallels 19th St. NW in Section 25 near North Town Border Station, and (between 60th Ave + 70th Ave).

Reasoning:

The location of the proposed new line on this map proceeds north of 19th St. and crosses over lawns of 2 occupied homes and very close to the "Olmsted County Landfill". Then it must katti-corner both 60th Ave + 19th St. to get to the North Town Border Station. If it followed existing pipeline, it would use a g. land (with lots of room) and only deal with crossing 60th Ave NOT 19th St.

-  Proposed Town Border Station & Route Buffer
-  Preferred Route
-  ROW Preferred
-  Town Border Station (TBS)
-  161KV AC Transmission Line Building (LIDAR)
-  Railroad
-  Gas Pipeline
-  City / Township Boundary
-  PWI Stream
-  NWI Wetland
