

To the Public Utilities Commission:

RE:     **Certificate of Need** – PUC Docket: IP-6981/CN-17-306  
          **Wind Site Permit** – PUC Docket: IP-6981/CN-17-307  
          **Transmission Line Route Permit** – PUC Docket: IP-6981/CN-17-308

Please add my name to the service list for this project. I am interested in receiving notices on these projects.

Below are my Completeness Comments, in response to the Notice issued in these dockets:

Does the Certificate of Need, LWECS site permit and HVTL route permit contain the information required by rules?

Should CoN and LWECS be referred for contested case or should an informal or abbreviated process be utilized?

Are there material issues of fact for contested case? Identify issues important to you.

Should all THREE dockets be processed together? Explain.

Wind projects do not require environmental review. If CoN and LWECS and/or HVTL lumped together, should the projects utilize a joint Environmental Impact Statement? If so, what environmental issues should be considered?

The Power Plant Siting Act provides an option of an Advisory Task Force for transmission and wind projects. Should an Advisory Task force be appointed? Would you serve on an Advisory Task Force?
