**Date:** 9/13/2021, 2:27 PM  
**To:** FOIA.resource@nrc.gov

Freedom of Information Act Officer:

I am seeking access to records under the Freedom of Information Act.

I am specifically looking for information regarding the TransNuclear TN-40 and TNHT-40 casks used at Prairie Island Nuclear Generating Plant, but am also interested in information regarding TransNuclear TN-40 and TNHT-40 casks used at any other location. The information I am seeking is:

1. TN-40 casks have seals that need to be replaced every 20 years. Please provide documentation regarding the need for seal replacement, specific to the casks at Prairie Island NGP, and secondarily, specific to others.
2. Please provide any and all information about seal replacement on the TN-40 and/or TNHT-40 casks at PINGP. If at PI, or another facility, name of plant, date, NRC docket, and the ADAMS Accession No. particularly!
3. Please provide any and all information regarding unloading of TN-40 and/or TNHT-40 casks after any period of use for storage. An INEL report is attached regarding attempt to unload a TN-24P.
4. Provide information regarding unsuccessful attempts and successful unloading of TN casks, including model of cask, date, facility, name of plant, NRC docket, (ADAMS Accession Nos. in lieu of copying).
5. Some casks are licensed generally for use in association with their Part 50 and 52 license -- identify these casks by manufacturer, model, and cask license number. Provide any and all documentation of use of casks licensed for Part 50 and 52 at a Part 72 licensed facility.

I am willing to pay the applicable fees, if any, associated with processing your request. Please contact me for further approval if the cost goes beyond \$100.00.

Thank you for your attention to this request. Please let me know if clarification is needed.
