

Data Request Form - Data Subject

Request date: 5/16/25

Contact information:

Data Subject Name: ? The AUAR and TRACT proposal - data center, industrial whatever (not

Parent/Guardian Name (if applicable): N/A

Phone number/email address: My phone - 612-227-8638

To request data as a data subject, you must verify your identity as outlined on the **Standards For Verifying Identity** form included with this policy.

The data I am requesting: Describe the data you are requesting as specifically as possible.

<p>At this time I request the following information and any supporting documents that serve as the basis for your response. If there is no information and/or no documentation, please so state:</p> <ol style="list-style-type: none">1. Provide map showing homes within distance increments of 250', 500', 1,000 feet, 1/2 mile, and one mile of the boundaries of the AUAR, with inclusive resident count for each range.2. Noise - The use of the word "mitigation" in the noise sections implies expected noise exceedences of Minn. R. 7030.0040 standards -- an issue in wind project permitting and operation -- and an issue where I've obtained utility buy-outs for residents inflicted with noise above state standards.<ol style="list-style-type: none">a. Provide documentation demonstrating expected operational noise and potential noise mitigation measures, including details of every facility that would be a source of noise.b. Provide basis for assurance in AUAR that every facility would comply with noise standards.3. Provide documentation of MW load for the data center and other projects in consideration for this area. If multiple buildings/facilities the MW load for each.<ol style="list-style-type: none">a. What is the expected range of load -- average and peak -- for each option under consideration.b. What is planned source of electricity, i.e., neighboring gas plant, other source.d. Provide copy of MISO interconnection studies and agreement for any projects requiring grid interconnection.4. If different than provided in email of 5/15, provide documentation of city's efforts and success in requiring that any energy using facility generate some or all of its own electricity - i.e., cover the facility and surrounding area with solar and batteries. If no efforts made, what will it take to make that happen? A project shouldn't be a drain on the area and it shouldn't be generating additional CO2 via the neighboring gas plant to cover its "high energy use."5. Provide documentation of volume of expected water use and source for every individual facility under consideration in this AUAR area.6. Provide copies of any and all Non-Disclosure Agreements executed by any and all city staff and elected officials.7. Provide copies of any and all land use, zoning, and/or ordinance changes formally or informally under consideration by the City staff, electeds, or city consultants that would have impact on this AUAR area.8. Provide copy of contract between City of Cannon Falls and project consultant/consultants. <p>Again, if a file review would be more convenient, please let me know some options of where and when. Carol A. Overland</p>

I am requesting access to data in the following way:

Inspection ☒

Copies ☐

Both inspection and copies ☐

Note: Inspection is free but we charge for copies as outlined in the **Data Practices Policy**

We will respond to your request within 10 business days

To Be Completed By Staff Member Responding to Data Request:

Identity Confirmed: No
